**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 21-24, drawn to an apparatus for feeding a treating agent onto a moving surface.

Group II, claim(s) 25-32, drawn to a method for feeding a treating agent onto a paper or board web.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features (evening out non-uniformities in the flow) for the following reasons: for group II the special feature does not define a contribution over Voith Paper Patent GMBH (EP A-1, 209,274). EP'274 discloses (see English Translated Abstract and Fig 1) a method for feeding a treating agent onto a web in the apparatus for curtain coating wherein evening out apparatus with inclined surface is paced underneath the feed apparatus and the treating agent flow is passed from the evening apparatus onto a moving web.

3. A telephone call was made to Patrick Stiennon on 06/13/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
